

Box Product References

Note there are many papers where box products are an important yet a secondary topic (for example Rudin's solution to the Dowker problem, Dow's A Separable Space with no Remote Points, or Vaughan's Products of ω_μ -metrizable spaces) are not included here.

Brunner, Norbert

1. Box products and the axiom of choice. [Boxprodukte und Auswahlaxiom (in German)] *Anz. Osterreich. Akad. Wiss. Math.-Natur. Kl.* 118 (1981), no. 8, 167–169.

Eric K. van Douwen

2. The box product of countably many metrizable spaces need not be normal. *Fund. Math.* **88** (1975), no. 2, 127--132.
3. Another nonnormal box product. *General Topology and Appl.* **7** (1977), no. 1, 71--76.
4. Covering and separation properties of box products. *Surveys in general topology*, pp. 55--129, Academic Press, New York-London-Toronto, Ont., 1980.
5. (with Kunen) Normality and paracompactness in box products. *Topology Appl.* **35** (1990), no. 2-3, 157--161.

William G. Fleissner

6. Box products of Baire spaces. *General topology and its relations to modern analysis and algebra, IV (Proc. Fourth Prague Topological Sympos., Prague, 1976), Part B*, pp. 125--126. *Soc. Czechoslovak Mathematicians and Physicists, Prague, 1977.*
7. (with Adrienne Stanley) D-spaces. *Topology Appl.* **114** (2001), no. 3, 261--271.

Gitik, Moti; Shelah, Saharon

8. On densities of box products. *Topology Appl.* **88** (1998), no. 3, 219--237.

Guran, I.; Zarichnyi, M. M.

9. The space of continuous functions, and box products. (Russian) *Izv. Vyssh. Uchebn. Zaved. Mat.* **1991**, no. 11, 22--24 (1992); translation in *Soviet Math. (Iz. VUZ)* **35** (1991), no. 11, 22—24

Knight, C. J.

10. Box topologies. *Quart. J. Math. Oxford Ser. (2)* **15** 1964 41--54.

Kenneth Kunen

- (with van Douwen) Normality and paracompactness in box products. *Topology Appl.* **35** (1990), no. 2-3, 157--161.
11. Box products of ordered spaces. *Topology Appl.* **20** (1985), no. 3, 245--250.
12. Paracompactness of box products of compact spaces. *Trans. Amer. Math. Soc.* **240** (1978), 307--316.
13. Some comments on box products. *Infinite and finite sets (Colloq., Keszthely, 1973; dedicated to P. Erdős on his 60th birthday), Vol. II*, pp. 1011--1016. *Colloq. Math. Soc. Janos Bolyai, Vol. 10, North-Holland, Amsterdam, 1975.*

L. Brian Lawrence

14. Failure of normality in the box product of uncountably many real lines. *Trans. Amer. Math. Soc.* 348 (1996), no. 1, 187--203.
15. Toward a theory of normality and paracompactness in box products. *The work of Mary Ellen Rudin (Madison, WI, 1991)*, 78--91, Ann. New York Acad. Sci., 705, New York Acad. Sci., New York, 1993.
16. The box product of countably many copies of the rationals is consistently paracompact. *Trans. Amer. Math. Soc.* 309 (1988), no. 2, 787--796.
17. Convergence in the box product of countably many metric spaces. Proceedings of the 1987 Topology Conference (Birmingham, AL, 1987). *Topology Proc.* 12 (1987), no. 1, 85--92.

Miller, Arnold W.

18. On box products. *Topology Appl.* 14 (1982), no. 3, 313--317.
